OBJECTIVE

"Highly motivated BCA graduate with specialization in Artificial Intelligence and Machine Learning, possessing strong skills in Python, SQL, Data Structures, Machine Learning, and problem-solving. Seeking an entry-level position to leverage technical expertise, analytical abilities, and innovative thinking to contribute to organizational success and build a successful career in the IT industry".

EDUCATION

Bachelor of Computer Application in Artificial Intelligence and Machine Learning Aug 2023 – March 2026
Ajeenkya D Y Patil University , Lohagaon, Pune

CGPA till 5th sem: 8.93/10.00

Higher Secondary Certificate (HSC) June 2021 – Feb 2023
Dnyandeep Vidya Mandir, khed, Ratnagiri
Percentage: 69.20%

Secondary School Certificate (SSC) March 2020
Chetan Dattaji Gaikwad Vidyalay, Met-Gutad, Mahabaleshwar
Percentage: 87.000%

SKILLS

Programming Languages: Python , SQL, C, Java

Frontend: HTML5, CSS3, JavaScript.

Database: MySQL, MongoDB

Development Tools/IDEs: Git, GitHub, VS Code, PowerBi, LookerStudio

PROJECT

AI-Based Student Dropout Prediction and Counselling System

- “AI-Based Student Dropout Prediction and Counselling System is an intelligent application designed to identify students at risk of dropping out by analyzing academic performance, attendance, behavioral patterns, and other educational data using Machine Learning algorithms. The system helps educational institutions take early preventive actions by generating predictions and providing personalized counselling recommendations. It improves student retention, supports academic decision-making, and enhances overall educational outcomes through predictive analytics and smart intervention strategies.”

smart-vaccum-cleaner

- “Smart Vacuum Cleaner using Python is an intelligent automation project designed to simulate the behavior of a robotic vacuum cleaner using Artificial Intelligence concepts. The system uses Python programming to detect dirt, navigate different areas, avoid obstacles, and clean efficiently through predefined algorithms and decision-making techniques. This project demonstrates problem-solving, automation, and AI-based environment interaction while improving cleaning efficiency and reducing manual effort.”

EXPERIENCE

Intern – AIML intern July 2025 – AUG 2025

Intern – Data Analytics Intern feb 2026 – April 2026

CERTIFICATES

Artificial Intelligence Intern 28 January 2026

Data Scientist Intern 15 Feb 2026

Gen Ai Powered Data Analytics job simulation 9 July 2025
